

Karel was hired to help repair the damage caused to Krásna Hôrka Castle. So Karel has to repair a set of stone pillars (represented, of course, by brands), in which some stones are missing. When the repairs are completed, all missing holes in the columns will be filled again. The columns are different heights and they are different distances from each other.

When uploading your program, use in the function `turn_on()` map name `task_4.kw`.

Initial situation

Charles begins in the southwest corner of the world facing east.

The end situation

Charles ends up in the southeast corner of the world facing east.
